

2008 Existing Home Rebates

Thank you for your interest in our marketing programs. Diverse Power offers cash incentives to member consumers upgrading their existing water heating and/or heating and cooling systems to more energy efficient equipment. In order to qualify for these incentives, please complete the following information and return it along with the paid receipt for the installed equipment to our office. Once this information is received, your rebate will be processed and credited to your account.

Please select the type of work performed:

Electric heat pump replacing existing heat pump, electric heat, or wood heater.

Electric heat pump replacing a gas furnace.

Dual fuel heat pump replacing any existing system.

Geothermal heat pump replacing any existing system.

Electric water heater replacing existing water heater.

Electric water heater replacing a gas water heater.

Gas water heater Brand and Model number _____

Waste heat recovery system added to an existing water heater.

Member Name _____

Address _____

City, State, Zip Code _____

Phone Number _____ Signature _____

Account Number _____ Map Number _____

1. All rebate requests must be submitted for installations that have been complete for no more than three months; this means that the HVAC and water heating equipment is installed in its final condition. If a job has been complete for more than three months, it will not be eligible for rebates.
2. Tankless water heaters are not eligible for rebates.
