

Green power is electricity generated from renewable resources that are more environmentally friendly than some traditional power sources. As a member of Green Power EMC, Diverse Power utilizes electricity generated from biomass; specifically methane gas reclaimed from the Taylor County and Roberts Road landfills. Landfill gas comes from the natural breakdown of wastes at the landfill site. The gas is collected and used to generate electricity. Typically the gas is wasted; in most landfills it's just burned off to prevent explosions.

Green-e Energy certifies that Diverse Power meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information on Green-e Energy certification requirements, call 1-888-63-GREEN or log on to www.green-e.org.

Price, Terms, and Conditions

If I want to terminate this agreement/ contract, what is the early termination fee?	There is <u>no cost</u> associated with terminating participation in Diverse Power Green Power program.
What length of agreement/ contract is required?	No contract is required.
What other fees might I be charged?	There are no other fees associated with participation in Diverse Power Green Power program.

PROSPECTIVE (2010) PRODUCT CONTENT LABEL¹

The product is sold in blocks of 100 kilowatt-hours (kWh). The product will be made up of the following renewable resources.

Green-e Energy Certified New ² Renewables in Diverse Power Green Power Program		Generation Location
-Biomass	100%	Fayette, Taylor, and Rabun Counties, Georgia
-Geothermal	0%	
-Eligible hydroelectric ³	0%	
-Solar	0%	
-Wind	0%	
TOTAL	100%	

1. These figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year.

2. New Renewables come from generation facilities that first began commercial operation on or after January 1, 1997.

3. Eligible hydroelectric facilities are defined in the Green-e Energy National Standard (http://www.green-e.org/getcert_re_stan.shtml) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org); facilities that are run-of-the-river hydropower facilities with a total rated nameplate capacity equal to or less than 5 MW; and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying Diverse Power includes: Coal (54%), Nuclear (31%), Oil (0%), Natural Gas (8%), Hydroelectric (7%), and Other (0%).

The average home in the United States uses 900 kWh per month. [Source: U.S. EPA]
